>> Main advantages

- ✓ All the metal karabiners pass the salt spray test for 72 hours against 50 hours as required by the European standards. Thus we maintain a higher benchmark against corrosion.
- ✓ The outer and especially interior edges of the karabiners are perfectly smooth.
- ✓ To guarantee the best quality, the production line of Singer® Safety is integrated.
- ✓ We control and produce in a single factory the creation and fabrication of the products: weaving coated thread into straps, stamping metal pieces and chemical treating, harness assembly, individual control and real-time testing thanks to the different laboratory devices and tools etc...
- ✓ **ISO 9001** certified manufacturing.

>> Conformity

This product has been tested according to the following European standard:
EN 362: 2004. Personal protective equipment against falls from a height. **Connectors.**

It complies with European **Regulation (EU) 2016/425** on Personal Protective Equipment (PPE). **Category III.**
 EU type examination certificate (**module B**) issued by **SATRA (Ireland)**. Notified body **n°2777**.
 The PPE is subject to the conformity assessment procedure based on quality assurance of the production process (**Module D**) set out in Annex VIII (Category III) under surveillance of **SGS Fimko Oy (Finland)**.
 Notified body **n°0598**.
