## **APRIL 2020**

Launch of our new range of leather clothing for welders which complements the already existing standard range and thus offers a wider choice of equipment for this activity.

A range of quality entirely redesigned by the technical team with quality materials, a safe and efficient design studied for each model to ensure the best performance during the work of professionals.

This range can be combined with our other protective equipment for welders: gloves, opto-electronic hood, shoes...
